Attention: Before you begin, be certain that your pistol is clear and safe.

You will need a small Phillips head screwdriver for assembly.

1. Remove the magazine from the magwell and clear the magazine of any rounds. Hold the magazine so the bottom faces up.

2. Slide an Allen wrench or a similar tool through the spring and gently pull the spring toward the top of the magazine so that it comes away from the base. Gently push the back of the magazine base forward. Be mindful of the spring and carefully remove it.

3. Slide the follower to the bottom of the magazine, line it up with the hole and remove it from the magazine. Leave the follower inside the magazine.

- Slide the upper half of the bumper over the top of the magazine and bring it down over the button hole. Replace the follower button in the follower. Feed the spring back into the magazine and then carefully depress the spring with the lower half of the bumper until it snugs onto the upper half of the bumper.

- Screw in the two screws into the appropriate spaces to secure the halves together

- Your magazine bumper is now complete!
